Control Valve Technician

This is a great opportunity for a Control Valve Technician, with sound knowledge and experience of control valves and positioners both electronic and mechanical. The role involves maintaining the availability and fault free operation of all of the Process Control valves for our clients. The role is predominantly based at our workshop in Aberdeen and from time to time on and offshore as required. Experience of working offshore would be beneficial, however, full offshore survival training will be given to the successful candidate as and when required. Previous applicants need not apply.

1. Key responsibilities

1.1	Maintenance and overhaul of various types of control valves and positioners
1.2	Carry out offshore and onshore work scopes
1.3	Liaise with clients in a professional manner
1.4	Maintain a high standard of workmanship
1.5	Deliver personal objectives and assist in delivering team objectives
1.6	Ensure the smooth and efficient running of all duties required

2. General responsibilities

2.1	Help maintain the high standards the Company has achieved
2.3	To be responsible for your own safety and that of your colleagues
2.4	To undertake such duties as may be reasonably expected

4. Person specification

	Essential	Desirable
Qualifications / Training	N/A	BOSIET
Skills / Knowledge	Sound knowledge and experience of control valves and positioners, electrical and mechanical	Offshore experience Proven track record
Personal Attributes / Other	Ability to work on own initiative	Good communication skills
